

CAREER OBJECTIVE:

I'm really interested in using my skills in business, technology, and communication to make a real impact. I want to make sure the new skills I'm learning line up with what businesses need these days. I'm also a fast learner and I'm always looking for ways to improve myself. In a dynamic work environment, I want to use my creativity to come up with innovative solutions that help businesses grow.

Key Competencies:

- Consistently approaches work with energy and a positive, constructive attitude. As Student vice Chair, I consistently motivated my team members by recognizing their achievements and fostering a collaborative environment that led to successful project completions.
- Demonstrates openness to change and ability to manage complexities. During my internship at – PRESBYTERIAN UNIVERSITY, I adapted quickly to a new software implementation by taking the initiative to learn the system and train my colleagues, ensuring a smooth transition for the team.
- Conscientious, consistent and ability to apply good judgment. While managing bursary allocations as Student vice Chair, I implemented a detailed review process that ensured fair and efficient distribution of funds to students in need.
- Well versed in understanding of customer-oriented service delivery process including procurement, logistics and finance.
- A team player with the ability to establish and maintain effective working relations with people in a multi-disciplined, multi-cultural environment with sensitivity and respect for diversity. advocated for additional online resources, improving the overall learning experience.
- Resourceful problem solver capable of implementing solutions to complex problems. While interning at PRESBYTERIAN UNIVERSITY, I encountered a logistical bottleneck in the supply chain. By proposing and implementing a new inventory management system, I streamlined the process and reduced delivery delays.
- Interest in delivering innovative and sustainable solutions. As part of a student-led environmental initiative, I spearheaded a project to reduce paper waste on campus by 20% through a digital document sharing campaign.
- Able to use information technology tools effectively. As Student vice Chair, I utilized Microsoft Excel to create a comprehensive bursary allocation spreadsheet that streamlined the application and review process, saving time for both students and administrators.
- Proficiency in MS-Word, Excel, Access, Power Point, and Microsoft Outlook. During my internship at jahness malimali boutique., I leveraged my skills

in Microsoft PowerPoint to create engaging presentations that effectively communicated project updates and data

analysis to stakeholders, leading to improved decision-making.

PROJECT

Exploratory Data Analysis on Ultra-Marathon Data

Project Overview

This project involved a comprehensive exploratory data analysis (EDA) of ultra-marathon data, focusing on uncovering trends, patterns, and actionable insights. The analysis was conducted using Python and Pandas, supplemented with advanced Excel techniques to enhance data understanding.

Data Cleaning and Preparation

- Data Collection: Gathered raw ultra-marathon data from various sources, including race results, participant demographics, and environmental conditions.
- Data Cleaning:
 - Handling Missing Values: Identified and addressed missing values using techniques such as imputation and removal of incomplete records.
 - Data Normalization: Standardized data formats for consistency, such as converting date formats and ensuring uniform measurement units.
 - Outlier Detection: Detected and managed outliers to ensure data accuracy and reliability.
 - Duplicate Removal: Removed duplicate entries to maintain data integrity.

Data Analysis

- Descriptive Statistics: Calculated basic statistical measures (mean, median, mode, standard deviation) to summarize the data.
- Correlation Analysis: Examined correlations between different variables (e.g., age, finish time, training hours) to identify significant relationships.
- Segmentation: Segmented data based on categories such as age groups, gender, and race types to perform targeted analysis.
- Trend Analysis: Analyzed trends over time, such as changes in participation rates, average finish times, and performance metrics.

Data Visualization

- Visualization Tools: Utilized Python libraries such as Matplotlib, Seaborn, and Plotly to create interactive and informative visualizations.
- Trends and Patterns:
 - Participation Trends: Visualized participation trends over the years, highlighting any increases or decreases in the number of participants.
 - Performance Metrics: Created graphs to show average finish times, completion rates, and performance improvements over time.
 - Demographic Analysis: Used bar charts and pie charts to illustrate the distribution of participants by age, gender, and geographic location.
 - Environmental Factors: Analyzed the impact of environmental conditions (temperature, humidity, altitude) on race performance using scatter plots and heatmaps.
- Interactive Dashboards: Developed interactive dashboards using tools like Tableau to provide a comprehensive view of the data, allowing users to explore different aspects of the analysis.

Advanced Excel Techniques

- **Pivot Tables:** Created pivot tables to summarize and analyze large datasets, providing quick insights into key metrics.
- **Conditional Formatting:** Applied conditional formatting to highlight important data points and trends.
- **Data Validation:** Implemented data validation rules to ensure the accuracy and consistency of the data.
- **Macros:** Developed Excel macros to automate repetitive tasks, such as data cleaning and report generation.

Tools and Technologies

- **Programming Languages:** Python
- **Libraries:** Pandas, Matplotlib, Seaborn, Plotly
- **Software:** Excel, Tableau
- **Data Sources:** Ultra-marathon race results, participant demographics, environmental data

Project: Tier 3 PostgreSQL Database Infrastructure Design and Technical Achievements

Client/Organization: Telecom Company

Role: Database Architect and Technical Specialist

Duration: 2022–2024

Overview:

Architected and implemented a comprehensive Tier 3 PostgreSQL database infrastructure for Telecom Company, ensuring high availability, redundancy, and robust disaster recovery to support critical business operations and data analytics. This project demonstrates expertise in enterprise-level database architecture, security implementation, and performance optimization.

Key Responsibilities:

- Designed and deployed multiple PostgreSQL instances with high availability, implementing both streaming replication for real-time data synchronization and logical replication for data integration and analytics.
- Configured advanced PostgreSQL parameters for optimal performance,

setting up secure replication users and authentication protocols.

- Established disaster recovery procedures through continuous archiving, automated backups, and standby instance configuration.
- Developed monitoring views to track system performance and implemented connection pooling to enhance query efficiency.
- Created comprehensive security configurations, including SSL/TLS encryption, network security rules, and audit logging systems.

Technical Implementation & Infrastructure:

- Implemented a primary data center with a master instance, along with synchronous and asynchronous replica servers and a disaster recovery site.
- Deployed real-time monitoring systems and an automated backup infrastructure, ensuring scalability and data integrity.

Notable Achievements:

- Achieved a scalable and secure database system that enhanced system reliability and performance.
- Enforced rigorous data integrity measures using primary, foreign key, and check constraints, optimizing query performance and reducing downtime.
- Developed a robust infrastructure that supported efficient transaction processing, customer data management, and service provisioning.

Additional Technical Competencies Demonstrated:

- Proficiency in ER modeling, relational database transformation, and schema optimization.
- Expertise in SQL query execution, database object management, and performance tuning.
- Applied best practices in database design, ensuring a secure, efficient, and integrated system architecture.

PROFESSIONAL EXPERIENCE

United Nations Office at Nairobi (UNON) Archives Unit January 13, 2025 - Present

Position: Archives Unit Intern

UNON Archives Unit Intern

January 2025 – Present, Nairobi, Kenya

Key Responsibilities and Achievements

Records Management:

- **Responsibilities:**
 - Manage and execute the retrieval of archival records, ensuring efficient access to critical documents while maintaining proper documentation protocols.
 - Conduct systematic appraisal of records to determine their historical, administrative, and legal value.
 - Implement disposal procedures in accordance with UN retention schedules and archival best practices.
- **Achievements:**

- Successfully streamlined the document retrieval process, resulting in a 30% improvement in efficiency.
- Ensured 100% compliance with UN retention policies through rigorous appraisal and disposal protocols.

Office Relocation Management:

- **Responsibilities:**
 - Coordinate and supervise the relocation of office materials and archival records between different blocks.
 - Oversee moving teams to ensure proper handling of sensitive and confidential documents during transit.
 - Develop and implement timeline management strategies to ensure relocations are completed within specified deadlines.

- **Achievements:**
 - Coordinated the successful relocation of archival records for over 10 departments, reducing document mishandling by 25%.

Project Coordination:

- **Responsibilities:**
 - Maintain detailed tracking systems for document movement and location changes.
 - Liaise with various departments to facilitate smooth transitions during office moves and ensure compliance with UN archives and records management policies.
- **Achievements:**
 - Developed a robust tracking system that improved coordination across teams and ensured timely project updates.

Quality Control:

- **Responsibilities:**
 - Monitor and verify proper packaging and labeling of archival materials during moves.
 - Conduct regular checks to confirm accurate placement and organization of relocated materials.
 - Document and report on the status of ongoing projects to unit supervisors.
- **Achievements:**
 - Implemented quality assurance measures that enhanced overall organization and accuracy of records management operations.

Overall:

- The internship remains ongoing with continuous involvement in improving records management processes,

streamlining office relocations, and enhancing data integrity across the unit.

Technical or Administrative Implementation & Infrastructure

- Developed and maintained electronic filing systems and digital archival workflows using SharePoint Online.
- Assisted in the integration of automated tracking and backup systems to ensure secure document management and disaster recovery.
- Supported the implementation of standardized records retention schedules and access controls to safeguard sensitive information.

Additional Technical or Administrative Competencies Demonstrated

- **Archives Management:** Proven ability to manage both physical and digital records while ensuring compliance with UN standards.
- **Project Coordination & Timeline Management:** Demonstrated expertise in coordinating multi-departmental projects, managing timelines, and ensuring seamless transitions.
- **Team Supervision:** Provided informal leadership and guidance to peers, contributing to a cohesive and efficient work environment.
- **Quality Assurance & Documentation:** Consistently monitored processes, verified accuracy, and maintained detailed documentation to support decision-making and continuous improvement.

Skills Demonstrated

- Archives Management
- Project Coordination
- Team Supervision
- Timeline Management

- Quality Assurance

- Documentation

COMPLETED ATTACHMENT – NAKURU COUNTY GOVERNMENT OFFICE IN THE DEPARTMENT OF ICT AND E-GOVERNMENT

From May 10th to July 29th, 2022.

Duties and Responsibilities

- Resolving hardware and software related problems: I provided timely and effective solutions to hardware and software issues, ensuring seamless operations of the office.
- Application Development: Designed, tested, and deployed computer applications tailored to departmental needs, ensuring alignment with user requirements and organizational goals.
- Installing and managing software: I installed and maintained software applications, ensuring optimal performance of computer systems.
- Providing on-site support to office users: I offered on-site support to users, resolving their IT-related problems and ensuring minimal downtime.
- Cybersecurity Implementation: Installed and configured endpoint protection systems, such as antivirus software and firewalls, to safeguard sensitive data against potential breaches and malware attacks.
- Network troubleshooting and maintenance: I conducted regular network maintenance and troubleshooting, identifying and resolving network issues before they affected the office's operations.
- Ensuring security of computer systems through installation and configuration of antiviruses: I installed and configured antivirus software to protect the office computer systems from viruses, malware, and other security threats.
- Data management: I managed and backed up data to prevent loss and ensure its availability for future reference.
- Concept initiation and development: I initiated and developed concepts to enhance the office's IT infrastructure, improving efficiency and productivity.
- LAN and Network Infrastructure: Conducted regular assessments and troubleshooting of local area network configurations, resolving connectivity issues and optimizing data transfer speeds for seamless communication.

Key Achievements:

One of the key achievements of my attachment at the Nakuru County Government Office in the Department of ICT and E-government was providing timely and effective solutions to hardware and software related issues, ensuring smooth operations of the office.

JKUAT STUDENT LEADERS.

Students vice Chair Nakuru Campus; 19th April 2020 to April 2021.

Duties and Responsibilities

- Assist the chairperson in all aspects of their role, including preparing and communicating new policies set by the university board to the student body.
- Coordinate with the chairperson to ensure seamless execution of student council initiatives and decisions.
- Oversee the allocation and distribution of bursaries to students, ensuring

- fairness, transparency, and adherence to university guidelines.
- Collaborate with the university's financial aid department to resolve any issues related to bursary disbursements.
- Assist the Sports Chair in managing all sports activities, including organizing events, coordinating with sports teams, and ensuring compliance with university sports policies.
- Facilitate communication between the sports department and other student council members to integrate sports into the broader student life.
- Represent the chairperson in their absence, making decisions and taking actions that align with the chairperson's vision and the student council's objectives.
- Ensure continuity of leadership and maintain the trust of the student body during the chairperson's absence.
- Monitor and manage the student budget to ensure that financial resources are allocated efficiently and effectively.
- Work with the finance committee to develop and implement budget plans that prioritize student welfare and activities.
- Partner with the secretary general to maintain high standards of leadership within the student council, promoting respect, integrity, and accountability.
- Ensure that all council meetings and activities are well-organized and documented, with clear communication to all stakeholders.

Key Achievement:

- Successfully facilitated the enrollment of Nakuru Campus students into virtual classes during the university's transition to online learning due to the COVID-19 pandemic.
- Provided ongoing technical and logistical support to ensure students adapted effectively to the new learning environment, enhancing their academic continuity and success.

Advocacy and Representation:

- Successfully advocated for the implementation of a mental health awareness program on campus, promoting student well-being.
- Lobbied the administration to increase funding for student clubs and organizations, fostering a more vibrant extracurricular scene.
- Negotiated with local businesses to offer discounts to students, reducing their financial burden.

Sales and Marketing Associate.

JAHNESS MALIMALI BOTIQUE.

Sales Department. 10th June 2017 to July 17th, 2020.

Duties and Responsibilities.

I offered sales and marketing service to residents of Njoro Sub County in Nakuru County. We sold both adult and children attire to the residents. This is well demonstrated through: -

- Marketing of the products to the local Customers far and around the boutique.
- Participated in selling and buying of Products available at the boutique.
- Monitor and follow-up transportation of business.
- Display and merchandise items make them more appealing to customers by designing the display and merchandise items. This includes seasonal display that highlight new items as well as a window display of new arrivals.

- Managing financial obligations by maintaining daily operations and ensures financial solvency. This includes calculating and paying sales taxes and ensuring outstanding liabilities are paid on time
- Sales Strategy: Developed targeted marketing campaigns that increased local customer footfall by 30%.
- Inventory Management: Streamlined inventory tracking using spreadsheet tools, reducing stock discrepancies by 15%.
- Renewal of the business license and filling Kenya Revenue Authority returns.
- Manage retail operations. Assisting customers and helping them try on items and complete sales.
- Managing inventory, both ensuring that all transactions are reflected in on hand inventory and conducting periodic inventory audits and organizing and maintaining the inventory files.

Key Achievements:

Assisted the owner to manage daily operations as well as the administrative and financial task that help the boutique remain financially viable.

COMPLETED INTERNSHIP – PRESBYTERIAN UNIVERSITY OF EAST AFRICA (PUEA) NAKURU TOWN CAMPUS

Nakuru County Kenya, August 15th, 2018 – October 23rd 2018.

Duties and Responsibilities

- Teaching packages, certificates and diploma students
- Provides assistance in the use of personal computer hardware, software, and specialized mainframe technology or operates a multi-platform computer environment and monitor · Installs software and repair hardware.
- Maintenance of printing devices. Ensuring that it's ready for use during work hours.
- Sets up and configure desktop computers.
- Monitor network and computer systems to improve performance.
- Database management skills.

Information and Technology Assistant.

PRESBYTERIAN UNIVERSITY OF EAST AFRICA (PUEA) NAKURU TOWN CAMPUS

October 23rd, 2017 - November 29th, 2017. Nakuru County, Kenya.

Duties and Responsibilities

- Assist the IT Manager: Provide support to the Information Technology manager in daily tasks, including planning, implementing, and maintaining IT systems and infrastructure.
- Staff Support: Assist other staff members in managing their schedules, coordinating meetings, and ensuring smooth day-to-day operations.

- **Hardware and Software Maintenance:** Inspect computer accessories and products for any breakages or damages. Perform routine maintenance and repairs on IT equipment such as computers, printers, and peripherals.

- **General Office Duties:** Handle general office tasks including answering telephone calls, processing orders, updating organizational databases, sending emails, and ensuring the maintenance of the working environment.

- **Technical Support:** Offer technical support to staff and students,

troubleshooting issues related to hardware, software, and network connectivity.

- **Data Management:** Assist in managing and updating databases, ensuring data integrity and security.
- **Network Administration:** Participate in network administration tasks, including monitoring network performance, performing backups, and implementing security measures.

Key Achievements:

- **Network Efficiency Optimization:** Successfully optimized network efficiency by 20% through proactive maintenance and troubleshooting, ensuring seamless connectivity and reducing downtime.
- **Data Backup System Implementation:** Implemented a comprehensive data backup system that safeguarded critical university records, ensuring data security and compliance with institutional policies.
- **Pressure Management:** Demonstrated the ability to work effectively under pressure and meet tight deadlines, ensuring that IT services were consistently available and reliable.
- **Customer Support:** Provided prompt and effective technical support to customers, resolving issues efficiently and enhancing user satisfaction.

Education and Professional Qualifications:

- 7th September 2019 – 20 April 2023
- **JOMO KENYATTA UNIVERSITY - BACHELOR OF BUSINESS IN INFORMATION TECHNOLOGY**
- 10th September 2017 - 26 April 2019
- **JOMO KENYATTA UNIVERSITY - DIPLOMA INFORMATION TECHNOLOGY**
- 15th February 2013 - 19 October 2016
- **ANESTER BOYS HIGH SCHOOL BAHATI - KCSE**
- -07 January 2009 - 19 November 2012
- **MICHINDA PRIMARY SCHOOL - KCPE**
- - January 2004 - November 2008
- **NDARUGU PRIMARY SCHOOL**

Training Attended:

- Value based leadership training.
- Positive perspective.
- Kenya Scout First Aid.
- St Johns Ambulance Training.

Awarded Certificates.

- Leadership certificate
- St Johns Ambulance Kenya
- Serein Education Centre
- Scout First Aider

REFEREES

Please feel free to contact the mentioned in regard to my competence, work ethic and performance.
